

ENERGY VIETNAM 2022

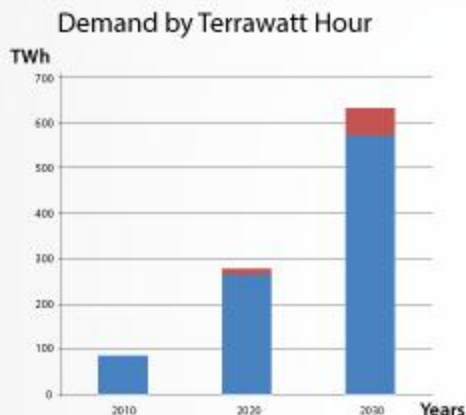

1 - 3 March 2022

At International Centre for Exhibition (ICE), Hanoi

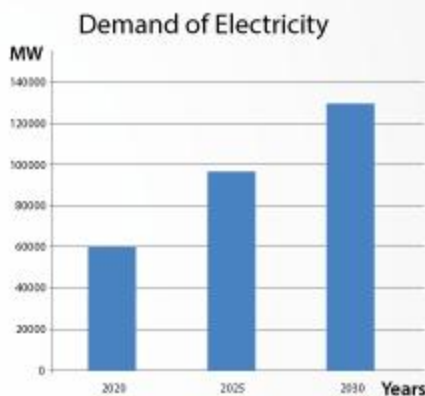

In the past two decades, Vietnam has experienced one of the world's most rapid economic growth rates. Economic growth has been key to the improvement of the quality of the people's lives, expressed most clearly in the dramatic drop in the poverty rate.

With growing industrialization and economic modernization, energy demand is predicted to increase by over 10 percent annually during 2016-2020 and by eight percent per annum during 2021-2030.

The demand will increase from 86 Terawatt hours (TWh) in 2010 to 265-278 TWh in 2020 to 572-632 TWh in 2030

To meet the growing demand, Vietnam needs 60,000MW of electricity by 2020, 96,500MW by 2025, and 129,500MW by 2030. To do so, the country needs to increase its installed capacity by 6,000MW – 7,000MW annually and spend close to US\$148 billion by 2030

As for the renewable energy sector, the funding required would be around US\$23.7 billion by 2030. For energy efficiency, a further US\$1.5 – US\$3.6 billion would be required during the same period, according to a report by the United Nations Development Programme.

Vietnam Largest Energy Event

During the 3 days, Energy Vietnam 2022 will present an update on the energy regulation on the renewable energy sectors, the implementation of smart electricity system in to the grid and how to maximise the usage of storage system when the sun is not shinning.

Here is what you can expect from our show:

- 80+ speakers will present their innovative solution and technologies
- 2 conference tracks presenting on Solar, Energy Storage and Smart Electricity
- Over 3500 attendees will be looking to invest in the solution
- 100 exhibitors and sponsors will be showcasing their latest technologies in the renewable energy and smart energy sectors.

On 6 April 2020, the Prime Minister issued Decision No. 13/2020/QĐ-TTg on mechanisms to promote the development of solar power projects in Vietnam (Decision 13) which provides, among others, the official FiT for certain solar power plants.

The FiT rate of USD0.0709/kwh applied for a ground mounted solar power plants and USD0.0769/kwh applied for floating solar power plants.

The expiry date of the FiT rate is 31 December 2020 and it appears that Vietnam may be phasing out its FiT in favour of more competitive market mechanisms such as renewables auction schemes, which the Ministry of Industry and Trade has articulated is necessary and suitable in line with international trends.

Profile of sponsors and exhibitors:

PV Panels suppliers and Manufacturers

PV balance of systems

PV Monitoring system

PV Mounting systems

Rural electrification and off grid solar

Engineering, Procurement
and Construction (EPC)

PV components such as cable, connectors, inverters and junction boxes

Solar Panel

With rising proportion of distributed renewable energy generation capacity in total capacity of the power grid, the natural instability of wind energy, PV or other renewable energy has caused increasingly evident impact onto the safety and stability of power grid.

As Vietnam looking to invest more in the renewable energy sectors, the demand for energy storage solution will increase from time to time.

Battery Vietnam 2022 will showcase micro grid and solar storage solution, utility scale storage solution, energy storage technologies.

Profile of sponsors and exhibitors:

Storage technologies

Storage System

Storage components and equipment's

Battery Grid

Get to know the latest technologies for energy providers: smart grid solution, blockchain, Ai, IoT, VR, data analytics, energy efficiency, and smart metering solution.

Ministry of International Trade (MoIT) and Electricity of Vietnam (EVN) have reviewed some activities in the implementation of the Smart Grid Road Map and decide plans for 2021. The Road Map aims to increase the quality and reliability of power supply as well as to improve the effective use of electricity.

The SmartElec Vietnam 2022 will showcase the latest technologies to help Electricity of Vietnam (EVN) to simplify the application of Smart Grid Road Map.

Profile of exhibitors and sponsors:

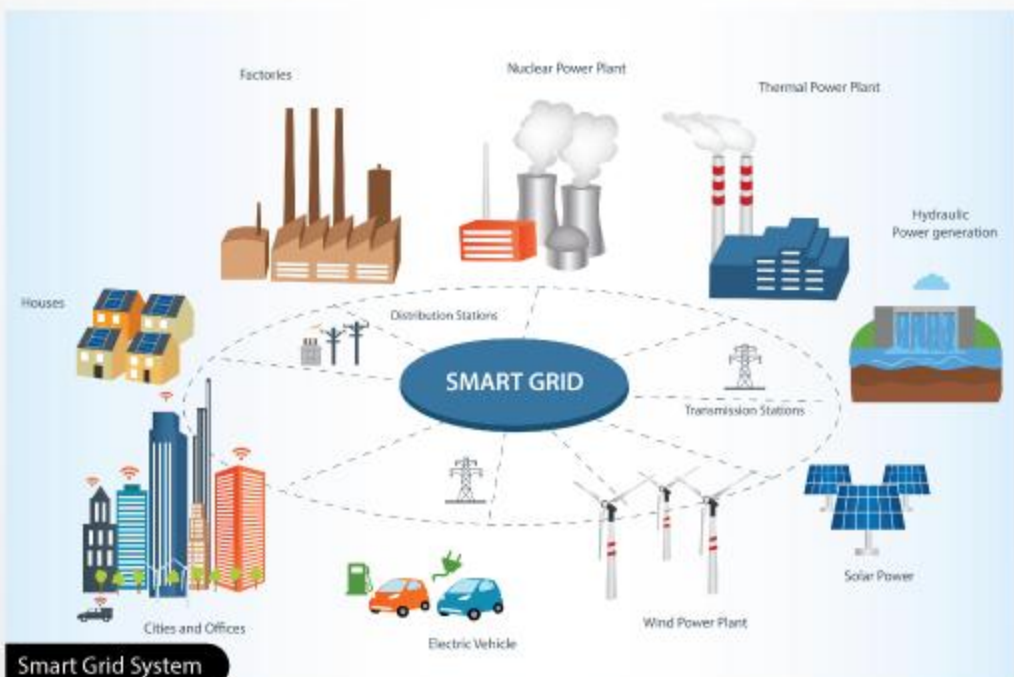

Smart grids

Smart metering

Big data

Energy efficiency

Demand side management

Smart Grid System

80% of Audience will come from Vietnam.

Vietnam power demand has grown fast in the period from 2001 to 2017 with the estimated average growth of 11.3% per year and is forecast to continuously increase in the next 15 years. Electricity price in Vietnam is quite low compared to other countries in the Asia-Pacific region.

The growth rate in the period 2017-2020 is forecast to reach 10.7%, in the period 2021-2025 and 2025-2030 would be 9.7% and 8.7%, respectively.

The ElecViet 2022 will be a platform to meet, hear and find a solution of energy shortage in Vietnam to achieve the forecast.

The show will showcase new products and technologies to help utilities and IPP in generation, distribution and transmission.

Profile of exhibitors and sponsors:

Power generation technology
and equipment's

Wire & cable

Transmission & Distribution products

Operation & Maintenance (O&M)

Engineering, Procurement and Construction
(EPC) and project developer

High Voltage Transformer

Sponsorship and Exhibition opportunities

Maximise your ROI by sponsoring our show in front of decision makers

BRONZE PACKAGE

Exhibition Booth	9 sqm
Seat Drop	1
Speaking presentation at the conference theatre	1

USD \$ 8.500

SILVER PACKAGE

Exhibition Booth	18 sqm
Seat Drop	1
Speaking presentation at the conference theatre	1

USD \$ 14.000

Exhibition booth starts from USD450/sqm.
Grab and register immediately to secure your prime location.

Reserve your booth now by contacting
Nathan at nathan@aira-expo.com

Sponsorship and Exhibition opportunities

Maximise your ROI by sponsoring our show in front of decision makers

GOLD PACKAGE

Keynote Speaker	1
Exhibition Booth	36 sqm
Seat Drop	1
Speaking presentation at the conference theatre	1
Exhibitor guide book	1

USD \$ 30.000

PLATINUM PACKAGE

Keynote Speaker	1
Exhibition Booth	54 sqm
Lanyard sponsor	1
Seat Drop	1
Speaking presentation at the conference theatre	1
Water bottle sponsor	1

USD \$ 55.000

Exhibition booth starts from USD450/sqm.
Grab and register immediately to secure your prime location.

Reserve your booth now by contacting
